

Applicant(s) : Nigel Paul Maynard  
Serial No. : 10/539,685  
Filed : August 9, 2006  
Page : 2 of 16

Attorney Docket No.: 65501-002US1  
Client Ref. No.: SHR505484-003

AMENDMENTS TO THE SPECIFICATION:

Please replace the paragraph beginning at page 14, line 32, with the following amended paragraph:

Alternatively, the target zone of the substrate is heated using radio frequency energy or microwave energy. In the case of radio frequency heating frequencies wavelengths of less greater than 2.4GHz are preferable. More specifically, frequencies wavelengths of approximately 27 to 40 MHz are particularly desirable.
